Your ears, like your teeth, benefit from periodic check-ups.

✓ Keep your hearing **IN CHECK**

The Importance of Annual Hearing Evaluations

When we talk about quality of life and hearing health, it is not just to enhance aesthetic pleasure of acoustic sounds within a person's environment. Hearing well has been shown to positively impact nearly every dimension of the human experience, including physical, emotional and mental health, perceptions of mental acuity, social skills, family relationships and self-esteem, as well as school and work performance.

With this in mind, it is important to make sure you are maintaining those same results with your hearing system. Your ears, like your teeth, benefit from periodic check-ups. Unchecked instruments may provide inadequate speech recognition, diminished

understanding in background noise and no longer fit the required prescription. In addition, hearing continues to deteriorate as we age, and the rate at which those changes occur differ per person. Getting your hearing and instruments checked annually allows your audiologist to stay on top of any hearing changes and keep your current devices working like new.

If you or a loved one is concerned about your current instrument's effectiveness, schedule your no-cost hearing screening today. A quick and easy hearing screening will tell you if today's technology will help you continue to achieve a more full and rewarding life.

Keep your knowledge in check

New technology, at a glance

Recent technological advancements have made hearing systems more comfortable, discreet, and better suited to changing environments. With our 30-day trial period, you can now check out these new features firsthand!

- ✓ Many new digital systems are nearly invisible and come in an array of trendy designs and colors to match hair and skin tones.
- ✓ With AGX MediaLink, you can use your hearing system like wireless headphones to listen to the TV, answer the phone and more!
- ✓ "Open Fit" technology greatly minimizes the "head in a barrel" feeling associated with many older styles.
- ✓ Tired of switching programs manually? Many new systems offer automatic features which adjust to your listening environment.

Welcome to the Team

We are pleased to introduce Anne-Marie Calkins, our new Doctor of Audiology. Anne-Marie comes from a Mid-Tennessee Ear Nose and Throat clinic and has

extensive experience in clinical hearing treatment. She received her Doctorate in Audiology from Pennsylvania College of Optometry, School of Audiology. She will be in our new North Port location.
